WEBSITES OF NOTE | Site Work

VISUAL COMPLEXITY

www.visualcomplexity.com/vc

“A unified resource space for anyone interested in the visualization of complex networks.” Some stunning examples from the growing field of information visualization. Check out the proposed New York Subway map, Oil Money (a map of political contributions), Hospital System, and Web Trend Map v3.0.

STRANGE MAPS

<http://strangemaps.wordpress.com>

A blog for those who are weirdly fascinated by maps — the first and maybe still the best form of information visualization.

DESIGN AND THE ELASTIC MIND

www.moma.org/exhibitions/2008/elasticmind

The Museum of Modern Art is definitely onto something: Web versions of its exhibitions that remain available long after the shows close. The design of this site may be a bit frenetic, but it provides a rich documentation of this influential show, including a complete checklist of all the objects and links to other resources.

UNIVERSAL LEONARDO

www.universalleonardo.org

Learn about the Great One, then go play with the “make a monster” feature.

HYBRID.COM

www.hybrid.com

Reviews and previews of alternative-energy vehicles plus tips on saving fuel and consumption comparisons of mainstream cars.

MIT CONVERGENCE CULTURE CONSORTIUM

www.convergenceculture.org

Mix MIT-caliber thinkers with researchers from its Comparative Media Studies program and leaders from cutting-edge companies, and something interesting is bound to happen.

AG BIOTECH INFONET

www.biotech-info.net

Great resource with links to media coverage and research on “all aspects of the application of biotechnology and genetic engineering” to the agricultural production, processing, and marketing of our food.

CORN CAM

www.iowafarmertoday.com/corn_cam

Definitely more interesting than watching paint dry.

We’re always looking for intriguing websites — however blurred the connection to architecture. Send your candidates to: epadjen@architects.org.
