

## Woburn - Woburn High School

### Project Summary:

Woburn is planning to investigate a number of high performance design features, including fuel cells, through a \$20,000 grant from MTC.

Contact: Mr. John Curran, Mayor/Chair of School Building Committee, (781) 932-4400

An additional grant in the amount of \$125,000 was awarded to aid in design and construction of the project. Prompted by the need to minimize operating expenses and reduce maintenance costs, Woburn is building a new high school that will include a number of energy efficiency features, indoor air quality improvements and a 35.6 kW solar array. Woburn is undertaking energy modeling to determine the most cost-effective means of maximizing energy efficiency. It is also looking for ways to improve water efficiency, reduce waste, and use the most sustainable materials possible.
