

SASAKI POLICIES AND PRACTICES

Firm Mission Statement

Better design, together.

At Sasaki, we believe defining the future of place must be a collective, contextual, and values-driven exercise. We all have a stake in this work.

Through our 65 years of practice, we have affirmed that diverse perspectives, blended disciplines, open exchange, deep engagement with clients and communities, commitment to history and context, curiosity about new ways of thinking and making, and expert facility with data and emerging technologies, together, will always unearth stronger design than one vision hewn by one author ever could.
